- Integrated Kendo Jquery UI and added custom code to change Grid layout and integrated Grid and Virtual Grid in project.

➢ *Studio 316*

Platform: Laravel + Next Js
Project Description:
- Site for teacher who releases his lectures online and their students register and login to watch videos online. Only logged in users can view all videos.
- Stripe payment integration for donation.
- Student's video watch history management to let admin know how many times a particular video viewed by any student.

➢ *HRDRV*

Platform: Laravel
Project Description:
- Service and community for music creators and users.
- Music creators, producers, song writers upload their songs and beats and users can listen. Some of the music is purchasable.
- Added User to Service provider chat/message functionality and also service provider raise request for payment directly into chat and user can pay directly from chat message. Used Socket for message functionality.

➢ *Shirtee*

Platform: Wordpress (Custom plugin)
Project Description:
- Create a custom plugin which fetches data from Magento Soap API to word press and users can directly import and update Magento products to Woocommerce. Also created functionality of sync orders from woo commerce to Magento through cron scheduler.
- Developed Automation system which will ask user for site details and when user submit with appropriate data site will be automatically created with latest wordpress, Woocommerce, selected theme,Shirtee Woo Plugin and much more.

➢ *Tentostack*

Platform: Wordpress (Custom plugin)
Project Description:
- Client requirement is to customize woocommerce to fulfill his requirement. His requirement is to create one form which is used to calculate the price and discount and based on that selection of the services/facilities and add that product to cart.
- Integrate WPML, Woocommerce's VAT number for NL and EU countries.
- Display orders of packages and projects which will be created by client in JIRA and client can select that JIRA project to dedicate user's/customer's order.

➢ *Adapie33*

Platform: Wordpress
Project Description:
- Simple CMS project. The site has simple CMS pages with 2 custom post filters functionality based on the terms. Filter contains 2 factors one is Google map and another is simple auto scroll down (load more) posts with brief description. On Google map factor display all the posts markers on map and on click on markers display brief information of a particular post on the right side.
- Whole filter functionality was achieved with Wordpress standard AJAX and jQuery.

➢ *Go It concept*

Platform: Wordpress
